At State Press Meeting Today on the
Government's Plans of Print-
ing on Envelopes.

(BY UNITED PRESS.)

ly toward the country printer. The
address caused great discussion.
Former Lieutenant Governor Emil
Barnoch of Manitowish spoke on the
foreign press as an instrument in
Americanizing the foreign born res-
idents and declared that the best evi-
dence of the success of the foreign
newspapers in Americanizing their
readers was the steady decline in cir-
culation of these papers. The elec-
tion of officers will be held late this

Value of Good Humor.

It is not great calamities that embitter existence; it is the petty vexations, the small jealousies, the little disappointments, the "minor miseries" that make the heart heavy and the temper sour. Don't let them. Anger is a pure waste of vitality. It helps nobody, and hinders everybody. It is always foolish, and always disgraceful, except in some cases when it is kindled by seeing wrong done to another; and even that "noble rage" seldom mends the matter.

No woman does her best except when she is cheerful. A light heart makes nimble hands, and keeps the mind free and alert. No misfortune is so great as one that sours the temper. Till cheerfulness is lost, nothing is lost.—Woman's Life.

A Squirrel Barometer.

A merchant in a western city has a queer barometer. It is a domesticated fox squirrel. He keeps the little pot in a large paint barrel, all inclosed with the exception of a small round hole in one end. Inside the barrel is a good supply of straw, old paper and leaves. During a run of weather of any kind, hot, cold, wet or dry, the little animal is in and out of the house, keeping an open door.

But should there be a change coming, say 10 or 12 hours off, the squirrel plunges up his hole with the matter from his bed and keeps it closed until the change comes. It is claimed the squirrel never makes a mistake, and that he gives no false alarms to his keeper.

FLAG STILL WAVES FROM TALL STEEPLE

Congregational People Have Not Devised Any Means of Undoing Fourth of July Frank.

If the man or boy who "shinned" up the Congregational church steeple during the night preceding the Fourth of July and "set the flag of glory there" will communicate with the H. L. McNamara hardware firm he may learn something to his advantage. Since taking the contract to replace the spire, which was blown off in a windstorm about a week ago, the concern's ways and means committee has been working overtime trying to devise a method of turning the trick without erecting expensive scaffolding—and lo, the steeplejack for whom they have been casting about comes like Nicodemus, in the night-time, and never leaves a card. The church people have all due reverence for the flag but they don't care for it as the crowning emblem of their house of worship. And in the meantime, pending the ultimate effort to replace the spire, any good working plan for getting the flag down without resorting to the use of a shot-gun, will be eagerly accepted and taken under advisement.

Later: It is learned that there are spikes in the steeple and that Allie Griswold will attempt the ascent tonight.

TEACHERS' SCHOOL STARTS ON MONDAY

Rock County Institute Will Begin Two Weeks' Sessions at High School.

Commencing next Monday morning at the high school building the Rock County Teachers' Institute will be opened and will continue its sessions in this city for the two weeks following. The institute will be in charge of County Superintendent O. D. Antkowiak and it is expected that over eighty teachers will attend the meetings. Assisting Mr. Antkowiak will be the conductors, Superintendent H. C. Buel of the city schools, Principal J. L. Whitford of Milton and Principal F. E. Converse of Deloit, who was to have taken part in the institute, was called west by a telegram, and Principal Roethlisberger, who has worked at the institute before and is very well liked, was secured. City Superintendent Buel, who is in Boston for the National Educational convention and will visit other eastern cities, will return in time for the opening of the institute.

At Whitewater. Fifty-five from Rock county are attending the six weeks session of summer school at the Whitewater Normal. Of this number thirty-five have not yet had any experience in teaching. Under the law recently passed no teacher can secure a certificate who has not previously taught or who has not attended, at least, a teacher's institute for six weeks or the normal school. Over four hundred are enrolled at the Whitewater school.

At Brookfield where the summer school of the Green county normal school is being held, several from Rock county are numbered among the enrollment of one hundred.

PLAN IMPROVEMENTS FOR GRADED SCHOOL

Eight Hundred Dollars Will be Raised For Enlarging Year For School At Afton.

Afton, July 8.—Eight hundred dollars was voted to be raised for the enlarging year, at the annual meeting of the Afton state graded school, held last Tuesday evening. This amount was deemed necessary in view of the fact that several improvements are contemplated, chief of which will be the putting in of a wall on the school grounds, the laying of a hard wood floor in the upper room and the building of a new fence around the district property. After this is done, if the funds will warrant, the school building will be repainted. Other buildings now under construction for three years. The board has secured Miss Carrie Pankow of Lake as principal for the coming year and Miss Soper will return as teacher in the primary department. In view of the fact that free text books are furnished, it was voted to charge a tuition fee of one dollar for each out-of-town pupil attending school here the full nine months.

Picnic the 4th. Several Afton young people held a picnic in the Deloit woods on the Fourth, with a few of the older residents as guests. A ball game was held in the afternoon, the teams being captained by George W. Robb and Fred Kethelohn, with Allie Drafaht acting as umpire. The Robb team won by a score of 6 to 5.

Robert G. Courault, who has just returned from a trip to Colorado, stopped off on Monday for a short visit with Afton friends, while enroute to Milwaukee, Wis.

Mrs. W. H. Barnhart and son Jack, have returned from a visit with relatives in Milwaukee. Miss Katharine Griswold accompanied them for a short sojourn here.

Members of the Eddy family from Deloit and Treckton, joined with those of this vicinity in a reunion at the home of J. H. Eddy on the Fourth.

A daughter was born to Mr. and Mrs. J. L. Clark last Sunday night.

There will be no preaching services at the Baptist church next Sunday morning, but Sunday school will convene at 10:30 as usual.

The Eldredge and Atwood families enjoyed a reunion at the home of L. J. McCrea on the Fourth.

Charles H. Griffin, who is still at the Janesville hospital, continues to improve.

George C. Oils, James W. Senlar, Jr., Harry G. Robb and Leroy Robb spent the Fourth at Lake Geneva.

Letters were granted Mr. and Mrs. W. J. Miller, by the First Baptist church of Afton last Sunday, to unite with the Baptist church at Crookston, Minn.

MORE LOOSE ENDS OF FAMILY TIES

Where is Julius Harris?—Thomas Caughlin, Missing 23 Years, Returns—Information for British Consul.

This must be the season for picking up loose ends of family ties. Chief Appley this morning received the following letter:

Marked Tree, Ark., 1910.
Chief of Police:
Wouldn't you please help me find a man by the name of Julius Harris. He used to live there but it was during the war years ago that my father, Thomas Harris, left there and I never knew what became of him. My grandfather's name was William Frederick Harris, my great uncle, used to keep store there in war time. Please help me hunt them up. Some one might know about them. Help me and I will pay for all trouble.
Yours truly
NELLIE ROSS.

Prodigal Returns Crippled.

With his right side paralyzed and minus the forefinger of his left hand, Thomas Caughlin, of whose whereabouts the family had known nothing for twenty-three years, arrived here from Kansas City yesterday afternoon and was taken to the county house by Postmaster Anderson. He was untidy, unkempt, and unshaven and said that he became so badly disabled in February as to be unable to keep his job with one of the railroads. He thought his sister, Mary, who married a Janesville man, might be somewhere in the vicinity. The sister, it was afterwards learned, is Mrs. Mary Kemmett, a widow, who is not in a position to take care of the returned vagabond and rover. She went to the county hospital today to see him. It is understood that another sister resides in Deloit.

Higgins' Descendants Live Here.

The Gazette yesterday published a letter from the British vice consul at Chicago inquiring for information concerning descendants of Roger Higgins, who might still be living in this vicinity. Allie Higgins, who lives in the town of Harmony, is believed to be related, and there is at least one relative residing within the corporate limits of Janesville.

THREE ALARMS KEEP FIRE LADDIES BUSY

Barn Blaze and Grass Fires Give Department Chance to Run Under Brelling Sun.

Children playing with matches ignited a quantity of loose hay under the floor of a barn belonging to J. F. Carlo, 633 N. Washington street, about half past two this afternoon, but prompt work by the fire department prevented the flames from spreading. Practically no damage was done as the fire was extinguished before it had an opportunity to spread to the frame of the building.

Two Grass Fires.

Two other alarms gave the fire department opportunities to "work out" under the blazing sun. Both alarms were caused by grass fires which were subdued without difficulty. The first came in at 11:50 a. m. from the corner of Glen and Hickory streets, and the second at 12:15 from Western avenue. No damage was done in either case although the flames, fanned by a heavy west wind, might have communicated to nearby houses if not quenched.

CLINTON MAN WITNESSED ARRIVAL OF NEGRO CHAMP.

R. C. Haven Was at North-Western Depot in Chicago When Johnson Arrived From Reno.

Clinton, Wis., July 8.—R. C. Haven was in Chicago yesterday and was at the depot when the train bearing Jack Johnson, the champion pugilist, arrived. He had a good opportunity of seeing Johnson and the reception tendered him by his colored friends and admirers. In the crush nearly all the buttons were torn from his clothes.

Theodore Ziek has his right shoulder broken, his right knee sprained and suffered other injuries in a runaway accident on Main street on Saturday night.

Harold Bruce returned to Deloit on Tuesday.

The street and sidewalks committee of the village board have had the grass and weeds along the sides of the streets of the town cut with a two-horse mower, two men being employed to do the work. The work has made a great improvement in the appearance of the highways. It is a matter, however, in which property owners should have enough pride and ambition to attend to.

Mrs. Leon Smith and daughter, Florence, returned yesterday afternoon from Milton where they spent the Fourth and several more days visiting friends.

Mrs. Victor Sullivan and daughter of Alexander, S. D., spent Wednesday night and Thursday morning here guests of Mrs. H. Newman. Mrs. Sullivan when a girl went to school to Mrs. Newman.

Postmaster R. H. Helmer and wife are attending the annual convention of the Wisconsin Editorial Association in Milwaukee today.

Mrs. Maudie Jackson of Chicago is visiting her cousin, Mrs. J. H. Switzer. S. G. Lake is able to be back at his place in Hamilton & Co.'s store.

LOCAL PARAGRAPHS.

Left For Delivery. Mr. and Mrs. H. L. McNamara left today for Deloit, Cal., where Mr. McNamara will attend the convention of the National Hardware Dealers' Association.

Look, Fred H. and Florence J. Blackstone of Kenosha, Cal.; C. E. Skidmore, A. J. Wagner and the Misses Zol Skidmore and Grace Atwood of Brookfield, and Mr. and Mrs. Harold Earl Haro of Horicon; A. Work of the Teacher.
To help the young soul; to add energy, to inspire hope, and blow the candle into a useful flame; to redeem defeat by a new thought, firm action; that is not easy, that is the work of divine men.—Emerson.

TROUBLE BREWING IN COLUMBIA UNIVERSITY.
President Nicholas Murray Butler at left, Professor Harry Thurston Peck at right.

New York, N. Y.—Because Prof. Harry Thurston Peck has been sued for \$50,000 damages by Miss Estelle Quinn, he has been asked to resign from the faculty of the Columbia university. He states that he is innocent of the charges brought by Miss Quinn and that the faculty has no right to force him out and that further, he will not resign under fire. In return he makes counter charges which are annoying to President Nicholas Butler. Professor Peck now holds the chair of Anton professor of Latin and English literature.

"I have known President Butler for 20 years and am acquainted with all of his weaknesses, the greatest of which is his greed for power," said Professor Peck. "It is a matter of record that the men who have declined to be dominated unjustly and to the detriment of the institution have had to go to please Dr. Butler."

"The trustees of the institution know nothing about the high-handed manner in which the affairs of the college are being managed."

"The finance committee is the only body that acts independently. Small matters like education are entirely overlooked."

"So far as my case is concerned, I intend to fight. I am absolutely innocent of the charge that has been made by Miss Quinn, but would not consider it an injustice if I were suspended until after my legal controversy with the young woman has been settled. I do not intend to resign, and I authorize the trustees to do so, has no legal right to make such a demand."

Correct Standing Position.
The correct standing position has been frequently described, but as frequently forgotten, or at least neglected. Chest up is the essential direction, and one might always say the only one needed, since in lifting the chest the shoulders are at the same time thrown back and down and the abdomen drawn in. To swell the chest with a full, deep breath and to hold the position is a secret of the correct position. The chin should be held in, but not stiffly so, and the weight should be on the balls of the feet instead of on the heels. One can teach oneself to take invariably that position when rising from a chair, at first consciously and afterward unconsciously.

RELEASED AS BIG LEAGUE PITCHER, COMES BACK IN YEAR AS CATCHER.

Catcher Mitchell, of the New York Americans.

New York City. The New York Americans, the team that is making such a fight for the American league pennant, has a catcher that has something on everyone else in the big leagues, or in base ball since the game became a national institution for that matter. He is Catcher Mitchell, who is doing splendid work behind the bat.

Two years ago Mitchell tried out as a pitcher with the Philadelphia and Brooklyn National League clubs. He was sent back to the minors to Montreal in the Eastern league. There

there was need of a catcher, so Mitchell went in to catch. He made good from the start and at the close of the 1909 season was taken by draft by the New York Americans. This season he has practically divided the catching with Sweney, the veteran of the staff, and has done work that has helped keep the Yankees right there. He is a stocky fellow, good thrower and although but a 300 hitter, bats in some timely smashes and hits them hard.

Such a thing as a pitcher being released from a big league and coming back as a catcher is without precedent.

Substitute for Wall Paper.

Among the peculiar substitutes for wall paper is that used in one of the New York art galleries. It is nothing but a huge rag carpet of neutral tone that covers the entire wall space. "I had it woven especially for this purpose," said the owner, "and my pictures never had a better setting, though I am bound to admit that the carpet attracts as much attention as the paintings."

Manufacturers Will Save 13% to 15% On Their Gas

Bills Now That the Reduced Rates Are In Effect

In countless processes of manufacture gas is exclusively used. In all cases where a high heat susceptible of exact regulation is required, gas can be used to better advantage than any other fuel.

Gas for industrial purposes is clean, convenient, requires almost no attention and is invariably economical.

Manufacturers who have not investigated the subject will be surprised to learn of the many ways in which gas may be employed to increase their output, lessen their expense and give them a better product.

Factories lighted with gas have an illumination nearer to natural light than if any other artificial illumination were used, and they have too the most economical light. A good light is necessary to maximum production in any plant.

Gas Rates Now In Force Are As Follows:

First 2,000 cubic feet per month
at \$1.30 per thousand
Next 3,000 cubic feet per month
at \$1.15 per thousand
All in excess of 5,000 cubic feet
per month at \$1.00 per thousand

10c per thousand cubic feet added
to the above rates if bills are not paid
within 10 days after date of delivery.
Minimum bill of 50c per month.

THE PURSUIT OF HAPPINESS. These rare philosopher-parrots who made the Declaration of Independence enumerated among the inalienable rights of man "life, liberty and the pursuit of happiness."

Why? Because happiness is not something you may discover, like a gold mine. It is something you cannot dig up or steal or corner or beg or borrow. You do not find it. It finds you.

How, then? Why, Nature is kind, after all. You cannot beg, buy, coax or force happiness from her. She will turn a deaf ear to your plaints and threats.

You were made for work. Old Mother Nature, who knows you, who made you and who some day will unmake you, lets you lose yourself in the joy of working...

PAYS HIS FARE WITH POETRY

Stowaway's Verse-Making Gift Saves Him From Service in Gallies on Pacific Liner.

Seattle, Wash.—George Parrott, poet and stowaway of Des Moines, Iowa, who has wandered over the earth, arrived here on the steamship Minnesota from Japan. Of all the queer human beings that have been landed here as stowaways on Pacific liners, Parrott is the first live poet to steal a ride. Instead of riding into the Seattle harbor in chains he was given a place of honor in the first cabin and when being dug out of the dirty hold had beguiled enough money to pay a first-class passage to New York where he has been promised a good position on a weekly humorous publication.

Parrott immediately made an appeal in blank verse for money which induced the water tender to take him up to the galley for a meal. He was locked up but managed to send an appeal in verse to the captain who came down to see the poet. Parrott on seeing the master immediately began firing poetry through the iron bars. Captain Garbin brought the youthful poet on deck and introduced him to passengers. Parrott announced a benefit at which he would recite poetry and it was largely attended and more than \$200 was raised with which Parrott is going to New York.

RISKS LIFE TO RESCUE BIRD

Traveler in British Guiana Plunges Into Water to Save Specimen for London Zoo.

London.—An interesting addition to the birds on exhibition at the London zoological gardens is about to be made by Sir William Ingram from Georgetown, British Guiana.

The representative, Wilfrid Frost, has returned from an expedition into the interior of British Guiana with living specimens of the extremely rare bird, cock of the rock.

The birds, with only stuffed specimens of which the public is familiar, are about the size of pigeons. The plumage is a beautiful bright red, though the tail and tips of the wings are dark brown, while the feathers on the head form a pretty arch.

Mr. Frost and his party had an adventurous journey. They were almost lost in a bush swamp and on two occasions disaster almost overtook them by water.

At one time, their canoe collided with a submerged log and the man at the bow was precipitated into the river.

At another Mr. Frost, in his endeavor to save the cages containing the birds from toppling over, had a narrow escape from being drowned himself.

Before starting on this expedition Mr. Frost took a number of birds of paradise from New Guinea to Tobago for Sir William Ingram, who is expert in the breeding of these birds in the West Indies.

FOOD FAKING CAUSES STIR

Hydrogen and Fluoric Acid in Milk, Ice and Sawdust and Potatoes in the Jams.

London.—So much has been printed of food faking in America that it is interesting to note a whole exhibition of doctored products over here. England has a food and drugs adulteration act, but that it has failed to stop the evil is clear from the proof at this show of alum, sulphate of zinc, potatoes and fuller's earth in bread, paraffin of hydrogen and fluoric acid in milk, jams made of sawdust, turpentine and various seeds, afterward colored "strawberry" and "raspberry"; coffee mixed with powdered chestnuts, burned figs, acorns and horse beans and sweetmeats containing ochre, sulphate of lime, red lead, shell lac and a host of vile coloring matters.

Boot polishers and printers' ink are made with the same dyes as are used in cheap sweets.

Also, there is a big outcry about the beds the British masses sleep on. All the poorer beds are stuffed with what is called flock, or "mill-puff," which is simply vile rags ripped up just as they come from the scavenger's dust heap.

Stringent legislation is being called for both as regards food and flock.

TREASURE IS MYTH

Stories of Hidden Gold of Aztecs Inventions of Historians.

Greatest Store of Precious Metal Was Found in Imperial Palace and Promptly Shipped to Spain by Cortez—Amount Is Small.

San Antonio, Tex.,—According to Jose Ramon Palafox, a Mexican journalist, who recently passed through this city on his way to Washington, there are no hidden Montezuma treasures.

"No doubt the stories circulated about the hidden treasures of the Aztec emperors have their origin in the badly exaggerated accounts of old Spanish historians—men who swarmed the ruins of the conquerors of Mexico and whose judgment had been upset by the few shipments of gold and silver made to Spain shortly after the taking of the Aztec capital," said Senor Palafox.

"The amount of gold and silver in the possession of the Aztecs at any time was comparatively small and in the case of the people consisting of little more than a few personal ornaments. The greatest store of these precious metals was found by the Spaniards in the Imperial palace and was promptly shipped to Spain by Cortez. Compared with the wealth of today even this was a mere drop in the bucket. The statement made by historians that Hernando Cortez sent ship loads of gold and silver to his king should not be taken literally, for in all probability it means no more than that heavy shipments of these took place."

"The accounts of the Montezuma treasure are merely a counterpart of similar extravagances found on many pages of history. We read of the fabulous wealth of the people of the Euphrates valley, of the ancient Egyptians, of India and other parts and so far have never found a trace of it. If, therefore, no doubt, these people had a certain amount of gold and silver, but they never had enough to cause us moderns to call them rich. Dispersed among them in the form of currency, as is the case today, their wealth in precious metals would have made a very poor showing. Gold and silver, then, as in the case of the Aztecs, were not used at all as mediums of exchange or were used only in a very limited way. Rulers paid and received tributes in the form of gold and as a rule converted it into articles of practical value or objects of art."

The old records show this down to a very late date. The tribute collected by the kings of Egypt, for example, were gold and silver vases, statues and the like. We see, however, reward the services of his generals by hanging a golden chain around their necks and so on.

"Conditions in Mexico when the conquistadores got there were the same. Metals did not figure to any extent as money or its equivalent. In the palace of the emperor gold and silver were found in the shape of cooking utensils, toilet articles and wall coverings. Perhaps a small store of gold and silver ingots was also discovered and so, no doubt, was a small quantity of precious stones."

"The so-called Aztec codices telling of the whereabouts of hidden treasure are all spurious and are sold to unsuspecting foreigners for fancy prices. It is an industry somewhat analogous to the making of antique furniture and jewels. Of course only the most credulous are taken in and usually one experience suffices to tell the purchaser of a codex that he has been humbugged. However, sometimes a great deal of harm is done by an unscrupulous man getting possession of a so-called codex. He is enterprising enough to turn his purchase to good account as far as he is concerned, but those who have been foolish enough to believe his plausible stories will find that the Montezuma treasure is no more than a fable—in fact, a swindle. Probably no one knows Mexico better than do its natives and nowhere are traditions and the like better preserved. In view of these facts it would be more than strange that the Mexicans should sell information as to treasures when he could lift the hoard himself."

Asked what he thought of the codex now said to be in the possession of an American by the name of T. A. Konyon, Mr. Palafox expressed himself to the effect that in all probability it was no better than other documents of that kind, and that quite often a so-called codex was well enough executed to even deceive those familiar with the subject.

"A great deal of harm has been done to Mexican investment opportunities by ancient mine and hidden treasure swindles," said Mr. Palafox. "No sane man should take any stock in either. Mexico is well stocked with Americans who do nothing else but exploit their countrymen on the other side of the Rio Grande. This also applies to some of the rubber land and colonization agencies. Americans ready to invest money in the republic should first get themselves in touch with the Mexican government. Doing this will save them money and disappointment."

WEEPS FOR BROKEN VIOLIN

Child Prodigy Leaves Audience After Ovation With Breaking Heart Over Accident.

St. Louis.—Although she scored a triumph before the Orpheus club in East St. Louis at its concert at the Broadway theater, Miss Mary McCausland, the fifteen-year-old St. Louis violin prodigy, left the theater with a broken heart. Her beloved violin, which she carried in its case under her arm, was broken and she is fearful that its wonderful tones may never be restored.

Just as she was leaving the stage after her final number, bowing and smiling in response to the enthusiastic applause that greeted her, she stumbled over a platform that had been used by the leader of the chorus and fell headlong.

She sprang to her feet and her left arm in the fall, but she did not think of that. She recovered composure quickly and smiled to the audience to assure them that she wasn't hurt, and then looked down at her instrument.

Miss McCausland picked it up tenderly and carried it off the stage, with difficulty holding back her tears.

The audience had not understood that the violin was broken, but a gesture by the girl told them and silence fell.

The instrument is a Lupot and is valued at \$1,200. It is 113 years old. She purchased it last winter and still is devoting the money from her concerts to finish paying for it.

NOVEL SUBMARINE WITH FINS

New English Invention Can Rise or Sink When Not Under Way—Electricity Controls.

London.—British naval authorities the other day examined a new submarine, invented by H. Middleton, which will sink or rise in the water at will without forward or backward motion. The new vessel is provided with two "fins" on each side, as well as a propeller. The propeller shaft can be turned at an angle, directing the boat to port or starboard, thus doing away with the rudder. The "fins" are curved flexible metal plates, and like the propeller, are driven by electric motors running from accumulators. These "fins" are able to propel the boat by their motion, making the vessel look like some large fish swimming gracefully. By bending the "fins" into the correct position the boat goes under and travels at any depth below the surface of the water. There is no "porpoise" motion, as in so many submarines when running under water.

The most interesting feature of the boat is its ability to "sink or swim." The model was loaded with weights and sank to the bottom of the shallow pools where it was shown off; then the "fins" were set in correct position for rising, and in a few seconds the submarine had come direct to the surface of the water. By working the "fins" at a different angle the vessel sank like a stone. The whole of the movements were governed by electricity.

\$600 FOR BUNCH OF ROSES

Nantwich Shoemaker's Kindness 12 Years Ago Unexpectedly Rewarded by Legacy.

London.—A Nantwich shoemaker, George Robinson, has had an unexpected windfall, which is a sequel to an incident that occurred 12 years ago. Robinson, then a journeyman shoemaker, met just outside Nantwich an invalid woman and nurse. He was carrying a bunch of roses, and the woman remarked as he passed, "What lovely roses."

He turned immediately and asked, "Would you like some, madam?" The lady said she would be very grateful, and added that she wanted some roses to put on her mother's grave. Robinson handed her the roses, and at her request gave her his address.

During the week-end a Llandudno solicitor visited Nantwich and told Robinson that Miss Parramour, of Craigydon, Llandudno, had died, and by her will left him £600.

CAT TAKES HEALTH VOYAGE

English \$600 Prize Winner Will Take Small Family Back on Return Trip.

New York.—Among the passengers arriving on the royal mail steam packet Oruba from the West Indies was a pedigree black and white Persian cat called Florio, owned by Sir Archibald Baker of London. The cat was put on board the Oruba at Southampton to make the voyage for its health. This was by order of a cat specialist who had been consulted by Sir Archibald, but when his pet's spirits seemed to be rather low.

Florio appeared to pine for three or four days after leaving port and on the fifth day gave birth to three beautiful kittens, two black and one gray, which are being cared for by the ship's stewardess. The mother won 100 guineas (\$600) prize at the Vaux hall cat show last summer.

DETROIT MAKING GREAT PREPARATIONS FOR ELKS' CONVENTION.

Upper left, James U. Sammis, exalted ruler D. P. O. E.; center, Mayor Drellmeyer, who has been active in arranging preliminary details for the reception of the Elks; at right, Dan McArren of Port Huron, Mich., one of the candidates for the office of grand secretary.

Detroit, Mich.—Seven nights and Detroit made such preparations to entertain and care for any gathering of visitors as it has for the Grand Lodge and Remembrance of the Elks and Protective Order of Elks to be held here July 11 to 16. The Elks will own Detroit that week. They will have no rivals. The city is theirs to do as they want.

Already the city is a mass of flags and banners in the lodge colors, purple and white. From every business place and nearly every residence, the Elks' head in relief or the pennants are shown, while thousands of yards of bunting string both sides of the main streets. One of the features of the decorations will be the arches built in various parts of the business district. These go completely across the streets with driveways on either side and passage for trolleys in the center. Groups of Elks surround each.

FIGHT FANS FROM AUSTRALIA ATTENDED THE BIG BATTLE AT RENO.

Reading from left to right they are: Hugh D. McIntosh, the Australian fight promoter; Miss McIntosh, Mrs. McIntosh, W. F. Corbett, Tommy Burns and Bill Lang.

San Francisco, Cal.—Tommy Burns, former heavyweight champion of the world, who was defeated a year ago last Christmas by Jack Johnson, the present holder of the heavyweight crown, arrived in San Francisco several days before the Johnson-Jeffries fight. Hugh McIntosh, the Australian fight promoter, accompanied Burns. Tommy is the same flashy dresser of old, and with the huge diamond heart pin, looks about the same as when he left the United States three years ago. Burns weighs 191 pounds and looks fit and ready to step into the squared ring at a moment's notice. Tommy has been in Australia close to three years. During that time he has fought four fights, winning three and losing the other. He fought Bill Lang and knocked him out in 11 rounds. He then put the crusher on

Bill Lang in six rounds, and then met defeat at the hands of the present champion. Three months ago he fought 20 rounds with Bill Lang, gaining the decision. His plans are unsettled. If he fails to secure a fight in California he will leave for England, where he has two or three matches in sight.

Bill Lang came to America for a crack at Stanley Ketchel or Sam Langford.

ARMOR PLATE FOUND TO BE BAD

NAVY STARTS PROBE AFTER DEFECTS DISCOVERED ON TWO WARSHIPS.

ROTTEN STEEL IS CAST OUT

Understood Investigation Touches Subject of How Much Foreign Capital Invested in American Ship-Building Concerns.

Washington, July 8.—About fifty tons of armor plate, so defective as to be worthless, was fitted to the two American dreadnaughts, the North Dakota and the Utah. The value of the plate was \$20,000. News of this startling discovery became public as the result of a protracted conference held at the navy department. The revelation is the more sensational because the North Dakota, which is the greatest and fastest warship afloat, is already in commission. The Utah, which is still building at Camden, N. J., is to exceed even the North Dakota in enormous dimensions.

A commission of the navy department is making an investigation of the matter.

The New York Shipbuilding company and the Midvale Steel company, builders of the ships, were represented at the investigation.

Who Runs Ship Yards.

It is understood that the investigation touched the subject of how much foreign capital is invested in ship-building companies that are constructing American warships.

A similar scandal developed some twenty years ago in which a similar line of inquiry developed.

The whole question is likely to come before congress at the next session.

Rotten Steel Cast Out.

In the meantime the defective steel has been removed from the two big battleships which were planned to beat the British Dreadnaught class of sea fighters.

ASK HALT IN RATES PROPOSED BY RAILROADS

Representatives of State Commissions Request Delay, Declare New Tariffs to Be Excessive.

Indianapolis, July 8.—At a joint meeting of representatives of the state railroad commissions of Ohio, Michigan and Indiana, a petition to the interstate commerce commission was presented requesting the suspension of the operation of the new freight rates submitted by roads in the Central Freight association territory until a thorough investigation of the cause could be made.

The railroad commissions, the petition sets out, believe the rates, which have been submitted to go into effect August 1, are excessive and are not justified by conditions and that they will work a hardship on the shipping public and on consumers.

The petition is signed by Commissioner Scully of Michigan, Commissioner Gotlin of Ohio and W. J. Wood, chairman of the Indiana commission.

The secretary of the Illinois warehouse commission, William Kirkpatrick, attended the conference, but said he did not have authority to sign the petition.

TWENTY HURT IN FIGHT RIOT. Dispute Arises Over Outcome of Reno Battle Among Miners.

Pittsburg, Pa., July 8.—A serious riot took place at the Turin Creek plant of the Cleveland Gas Coal company, about ten miles from here, during which about twenty coal miners were injured. The fight started during a dispute over the merits of the Jeffries-Johnson fight. Most of the men engaged in the scrap were white men, and the fight was the result of one of the white men championing the colored fighter. The battle began with fists and ended in the use of clubs, rocks, knives and revolvers.

BOOST WILSON FOR PRESIDENCY.

Democrats Plan Campaign to Make Princeton Head a Candidate.

New York, July 8.—Woodrow Wilson, president of Princeton university, will be the Democratic candidate for President of the United States in 1912 if a combination of Wall street and political interests can make him so. Preliminary plans are already under way. As a first step President Wilson is to be nominated this fall for governor of New Jersey on the Democratic ticket. He will be backed by the interests and proffered over Harmon or any other Democrat for the presidential race. The representatives of the big men in the combination to bring this about are Roger C. Sullivan, Democratic national committeeman from Illinois; former United States Senator James Smith of New Jersey, George B. M. Harvey and a prominent New York Democratic politician, Tom Taggart of Indiana also is said to have approved the plan.

MRS. YOUNG HEADS EDUCATORS.

Chicago Woman Defeats Regular Nominee for N. E. A. President.

Doston, July 8.—Mrs. Ella Flagg Young of Chicago was elected president of the National Educational association, after a contest in which she and her supporters defeated the nominating committee.

When the convention assembled, however, Mrs. Young was nominated and elected from the floor.

Threaten to Close Indiana Mines.

Terre Haute, Ind., July 8.—The Indiana operators and miners, it is announced, have agreed on all parts of the wage contract except the clause fixing miners for calling local strikes without first resorting to arbitration. Both sides are determined, the operators declaring the mines will be closed if the point is not conceded.

Italian Proverb. Beware the geese when the fox preaches.

SPAIN'S POLICY IS REVIVED.

Nicaragua Begins Infamous Reconcentration Policy Which Ruled Cuba.

Washington, July 8.—The state department is informed that Nicaragua has begun the reconcentration policy which made Spanish rule in Cuba so infamous.

The department has the text of an order issued by Sebastian Salinas of the department of Granada, which commands "all the inhabitants of the Mombecho ridge to assemble within twenty-four hours in Granada, without distinction of age or sex."

Persons not complying will be "regarded as revolutionists and treated as such." That is, if General Salinas thinks it he may shoot them or starve them into submission. The people of this ridge are anti-Madriz and they are to be crushed in the most barbarous manner.

London, July 8.—It will cost Andrew Carnegie \$150,000 to reimburse the victims of a lawyer named Russell who absconded recently from Dunfermline, Scotland. Mr. Carnegie's native town, and the object of his most benevolent interest. The trustees of Mr. Carnegie's various Scottish enterprises visited him at Skibo Castle, not long ago, and he gave them virtually blank checks to fill in the amounts and pay the money to as many of his poor fellow townsmen of Dunfermline as suffered through Russell.

Vast Tracts Set Aside Under Provisions of New Law.

Beverly, Mass., July 8.—Continuing the policy of conservation, President Taft signed orders withdrawing 35,073,164 acres of coal lands from the public domain in the states of North and South Dakota, Utah, Colorado and the Territory of Arizona.

Of the total withdrawals 20,698,469 acres are new, while 14,374,695 acres are covered in confirmations and ratifications under the new law, approved June 25, of withdrawals made during the last four years by both Presidents Roosevelt and Taft.

North and South Dakota are the two states affected by the new withdrawals. From the public domain in North Dakota the president has withdrawn from settlement 17,828,182 acres of land believed to contain workable coal. In South Dakota the amount withdrawn is 2,870,287 acres.

Chicago Woman Fatally Wounds Husband and Child.

Chicago, July 8.—After shooting her husband and three-year-old daughter, Mrs. Emma Mulrow ended her own life with carbide and early in her home. The husband, Henry H. Mulrow, and child were taken to St. Elizabeth's hospital in a dying condition.

Notes left by the wife and mother told a pathetic story of abuse and neglect and how she "just stood it as long as possible." She charged her husband with neglecting her for other women and choking her when she asked him to take her and the baby for a walk.

Boston, Mass., July 8.—The great gathering of educators from over the entire country in what is known as the National Educational association ends tonight. The convention was called to order last Saturday and will continue until this evening.

One thousand delegates were present from Chicago alone and in all it is estimated over 10,000 people attended the convention.

The room for Mrs. Ella Flagg Young, superintendent of the Chicago public schools, for president of the N. E. A., resulted in her election yesterday and it is the first time a woman has been so honored.

The opening general session of the convention was held in the Harvard university stadium Monday. Addresses were made by Gov. W. W. Kitchen of North Carolina, David Starr Jordan president of Leland Stanford Jr., uni-

The oddest named country home is in Jackson county, according to a Columbian who is a friend of the owner. The name as it appears at the front gate is "Hadherway," and never fails to attract attention from passersby. For years the wife wanted to leave Kansas City and go to a farm. When the family finally moved they named the home "Hadherway."—Columbia Herald.

Preparing for the Trip

"It is almost time for me to be going," said Mrs. Bluxley's caller, "for George will be waiting for me and mademoiselle will be there to give us our French lesson."

"I didn't know you were studying French," remarked Mrs. Bluxley.

"Yes, we've been taking lessons for the last month. We sail July 1, you know."

"I should hardly think two months of French would benefit you perceptibly," observed Mrs. Bluxley.

"But we are getting on beautifully," returned her friend. "Mademoiselle is the dearest thing! How she does work with us! She will carry a chair out of the room, asking, in French of course, 'What am I doing now?' And we answer her, 'you take out the chair.' Then she will bring it back, inquiring, 'What am I doing now?' and we reply, 'You bring in the chair,' and so on. George says she has carried out and brought back everything in the room except the piano. It's a lovely way to learn a language, for we are not bothered with books."

"You are not going to engage in the business of moving furniture while you are abroad, are you?" asked Mrs. Bluxley.

"Of course not, but think of all the words we are adding to our French vocabulary."

"If you are anxious to study French in that way, it seems to me it would be practical to have your teacher represent a dressmaker who has spoiled a garment for you and learn to express in a few emphatic and incisive words your intention to throw the dress back on her hands unless suitable alterations are made."

"But French dressmakers—modistes I suppose I should call them—never make mistakes," suggested the caller.

"Don't they?" exclaimed Mrs. Bluxley. "If you could see a princess gown that I bought in Paris, with a back seam that started on the right path, but was lured to one side, you would think French modistes do make mistakes."

"Then I shall ask mademoiselle what to say when one wants changes made in a dress," said the caller. "My dear, if you had studied the language before you sailed you would have saved yourself both money and vexation."

"We had three months of French before we went over," replied Mrs. Bluxley. "My husband had studied Latin in his youth, which he said was a great help to him in speaking French, and he was quite proud of his ability in that line—before he went to France. He hasn't mentioned it since."

"Didn't he know how to make use of his knowledge?"

"He had a perfect genius for saying the wrong thing," declared Mrs. Bluxley. "He got us into trouble more than once. One night when we were traveling through the south of France Mr. Bluxley went to the ticket office to have our tickets visé when the train stopped at Narbonne. I believe it was. I never did learn what he said, but several of the officials came to the window of our compartment as angry as so many hornets and all talking at once. I thought of the way the French people acted during their revolution and my blood ran cold."

"How did it end?" asked the caller.

"There was a little American woman asleep in one corner of our compartment who, awakened by the noise, spoke French so rapidly for a few minutes that she must have made even those natives dizzy. She seemed to have explained whatever it was and they slunk away without another word. I asked her what it was all about, but she was grumpy and sleepy and not inclined to conversation."

"Didn't you ask your husband what he had said to make those men so angry?"

"Yes, but he did not seem to know. He evidently had used the wrong words."

"I will have mademoiselle arrange a hypothetical argument with railway officials," remarked the caller, thoughtfully.

"I would," advised Mrs. Bluxley, "and be sure to have her explain the difference between a 'jupon' and a 'jupe', for you will need the words in shopping."

"This conversation reminds me of a dream I had last night," said the caller. "I thought I was in Paris and that mademoiselle, dressed as a tight-rope walker, was tripping gaily over a wire that reached from the Louvre to the Place de la Concorde. When she caught sight of me she swung by one toe, calling out: 'What am I doing now?'"

"Thousands of people seemed to be waiting for my answer. As I did not know the French word for swinging and had forgotten the French word for toe, I woke in great trepidation."

"It gets on one's nerves dreadfully to study a foreign language."

Chickens a La Mode.

Fredie was visiting relatives in Canada and his mother constantly brought him to be on his good behavior and to avoid saying anything that might give offense, but one day when his aunt asked him at luncheon if he would have some chicken he could not help showing his surprise.

"Why, what's the matter, Fredie?" inquired the aunt. "Don't you like curried chicken?"

"Well, aunt, I can't really say," was the reply. "You see, down in the states we don't carry our chickens—we pick 'em."—Dollinger.

DAILY DIET AND HEALTH HINTSBy DR. T. J. ALLEN
Food Specialist**EXCLUSIVE MEAT DIET CURE INJURIOUS.**

An exclusive meat diet, as a means of cure, has one of the benefits of the milk and some other monodiet cures, that it contains every element of nutrition in harmonious combination and easily digested, thus saving vitality ordinarily spent in adaptation to the incongruous meat, for the restoration of normal health conditions; and naturally many cures are credited to it; but my investigations at two sanitariums where this treatment has been used convinced me that with certain exceptions to be expected from a consideration of the principles just stated, the exclusive meat diet is injurious. In many cases in which the results were at first most favorable, the ultimate result was loss of strength. The carnivorous animal has a stomach much larger than man's proportionately, and a short intestine, with a larger liver and stronger kidneys. The digestion of meat is largely in the stomach, and the retention of its putrefying waste in the long, tortuous intestine of a non-carnivorous animal is productive of the most serious auto-intoxication. These principles are fully borne out by a fair clinical test.

WOMAN'S PAGE**The Evening Chit-Chat**

By RUTH CAMERON

PLEASE, Mr. Masculine Reader—If such a thing exists—don't read a word further tonight.

And since, after that warning, of course the eye of every one of you is racing down the page I'll save you bitter disappointment by telling you my most innocuous reason at once.

Tonight's topic can't possibly interest you.

It's just a few dos-and-don'ts of the millinery world.

They were most eagerly contributed by my milliner to distract my attention while I waited for the hat that was to have been done three hours before.

Positively painful isn't it, Miss Cameron, to see some of the outlandish things that people who have fairly good taste in other matters will put on their heads?

"Tell you some of the things one should avoid in getting a hat? Well, let me see."

And these are the "dos" she evolved.

"First of all, don't put blue roses and green poppies and yellow geraniums, and all the rest of the flowers that never were on land or sea, on a hat. There is nothing in worse taste than a flower done in some color it could not possibly be."

"In buying a hat get it to harmonize with the clothes you are going to wear it with, not only in color but in general style. For instance, don't get a lace hat to wear with a suit. That's about on a par with diamonds in the morning or a train and low neck on the street."

"Of course you never should put flowers or plumes on a utility hat. Plumes aren't good taste for a walking or business hat anyway, and neither flowers or plumes look at all attractive after the first damp day. Always trim your utility hat with either feathers or ribbon. You can get much smarter effects with them and effects that will last much longer."

"You wouldn't think it would be necessary to tell people not to put flowers or feathers on a Panama, but it is. Why I've seen lots of people who were dressed in fairly good taste otherwise walking around with that particular blunder on their heads."

"I mustn't forget to say something about the auto-helmet craze. If a girl wants to mark herself 'cheer' in letters big enough to be seen as far off as she is, the best way is to go about the streets with one of those things on. I don't see why it isn't just as out of place as it would be to wear a riding habit to your business or on a shopping tour and I don't believe anyone would do that."

"And while I'm talking about hats I must surely put in a word for the proper care of them. The summer hat needs its daily brush every bit as much as the winter one, but it doesn't seem to get it somehow. Of course straw doesn't show the dust as felt does, but dust is there just the same and once the hat gets wet, the straw, if it is light, is apt to be badly discolored. So whatever kind of hat you have don't forget that daily brush."

And now Mr. Masculine Reader if any of you did read this far, don't you wish you had heeded my warning?

ARRESTED IN JAPAN CHARGED WITH PERJURY.
Miss Lu Edith Smith.

Santa Rosa.—Miss Lu Edith Smith, the woman Dr. Willard P. Burke is accused of attempting to kill by an explosion of dynamite at Burke's sanatorium, will be arrested at her refuge in Yokohama and will be extradited to America on a charge of perjury.

District Attorney Clarence P. Lea has sworn to a warrant charging the fugitive witness with perjury and already has directed the authorities of Japan to arrest her. If the extradition treaty between the United States and Japan permits of the return of a prisoner charged with perjury, Miss Smith will be brought back to this country in time to testify at the trial of Doctor Burke on September 1.

The action of the district attorney will take the Lu Edith Smith case directly up to the state department at Washington, and requisition will be made on the government of Japan to recover the woman as soon as it is known that she is held by the Japanese police.

Miss Lu Edith Smith was a student at the University of California when she met Doctor Burke, who conducts the health resort at Burke's near Santa Rosa. She was the chief witness for the state after a mysterious dynamite explosion, which nearly killed her as she slept in a tent at the sanatorium. Burke was indicted on the count of having fired the explosive.

Sometime after the dynamite episode the woman left Sonoma county and went to Berkeley. Subsequently she disappeared from Berkeley, and was next located in Japan.

Let Malefactors Begin.
A witty Frenchman was asked if he did not think it was high time to stop putting men to death. "Yes," he answered, "but let the murderers be the gentlemen to begin." The same rule applies to all phases of the warfare between criminals and society.

Useless Statistics.
Some statisticians have figured out that Americans lose \$10,000,000 yearly by leaving sugar in the bottom of their coffee cups. Of course they don't, but still there is a certain fascination about statistics. They are so strikingly useless.—Philadelphia Ledger.

LAST LETTER ON THE RENO FIGHT

GRAPHIC PEN PICTURE OF THE
FOURTH OF JULY BATTLE.

WATT TELLS OF CONTEST

Also Sends Souvenirs of the Arena
With Bit of Rope With Jeffries' Blood on It.

Since Reno, Nevada, was decided
upon as the place of holding the great
belle contest between Jim Jeffries and
Jack Johnson for the heavy-
weight championship of the world,
William W. Watt has given the readers
of the Gazette a rare insight into the
happenings in the western city he now makes his home.

Mr. Watt's letters have been read
with interest by all his old friends
here and by many new ones and re-
peated requests have been made that
he write his impressions after the big
contest was over. The letter which re-
sulted is published this morning fol-
lows and tells graphically of the bat-
tle of the century and Watt's impres-
sions of the crowds and happenings
without going into detail of the fight
itself.

Not only does Mr. Watt send his
letter but he also gives his Janesville
friends an opportunity of seeing a
bit of rope that surrounded the ring
side—a piece of rope with some of

by erecting a balcony twice as large
as their contract called for. It com-
pletely shut the ring out from fully
three hundred men who had paid
twenty dollars each for their seats.
When these seats were filled the
crowd went wild and threatened to
tear down the entire moving picture
outfit.

Richard finally made the statement
that if the machine men did not re-
move the extra structure he would
order the state police to destroy it
and would see that the fight was held
until the stand was down. This sat-
isfied the crowd and soon the picture
house was a wreck.

The picture men then devoted their
entire attention to the balcony that
was originally erected for their bene-
fit and from this lofty stand they
worked ten machines.

At the ring side were gathered the
most celebrated lot of glove artists
and sporting celebrities in the his-
tory of the game. Among those pres-
ent might be mentioned James J. Cor-
bett, Muldoon, Fitzsimmons, Lang,
Tommy Burns, Hugh McIntosh, Lang-
ford, Battling Nelson, Mike Murphy,
Al Kaufman, Bob Armstrong, George
Considine, Jack McAuliffe, Abe Attel,
Jim Coffey, Louis Blot, Billy Ar-
strong, De Witt Van Court, John L.
Sullivan, Sam Berger, Ed Heider, Billy
McCarney, Jack Root, Joe Chynus-
ki, Tom Sharkey, Tom Jones, Stanley
Ketchel, Joe Egan, John Grant, Tim
Sullivan, J. W. Morrison and scores
of others.

The greatest aggregation of news-
paper men that ever assembled in
any place was present at the fight.

fifty people in those places of business
and in spite of the stacked up en-
deavors on one end of the rooms, the peo-
ple clamored for the beds.

Not a business firm in the city but
what has been benefited by the
bringing of these thousands of vis-
itors into Reno. They left here a
fortune.

They also found here an ideal city
backed up by progressive business
men who spared no expense in pro-
viding entertainment for the thou-
sands day and night.

**SCHOOL CENSUS OF
THE CITY OF MONROE**

1187 Children of School Age in City
and Outlying Districts According
to Returns.

(SPECIAL TO THE GAZETTE.)
Monroe, Wis., July 7.—The returns
from the taking of the school census
for the city of Monroe and the out-
lying districts, show that there is a
total of 1187 children of school age,
23 belonging to the district outside of
the city, 466 out of 480 between the
ages of 7 and 11 attend school and
7 out of a total of 9 outside the city
who are in school the required length
of time. The returns show that the
girls remain in the majority, there
being 596 girls to 591 boys in the
city. Mahlon Caradine took the
school enumeration.

An appropriation of \$28,160 has
been made for the coming year.

MONROE'S BALL TEAM IS STRENGTHENED

Chayka and Kremer, Formerly With
Dixon (Ill.) Browns Added to the
Staff.

(SPECIAL TO THE GAZETTE.)
Monroe, Wis., July 8.—Two new
ball players, Chayka and Kremer, of
the Dixon Browns, have been added
to Monroe's ball team, which
will strengthen the team materially.

Chayka is one of the best throwers
outside of the big leagues and a
splendid hitter. Kremer pitched last
year for Galena and opened this
season with Dixon until that aggregation
broke up. The first game will be
twisted with Monroe next Sunday
when the Janesville Athletics come
here. The team has been putting in
afternoon practice every forenoon and
afternoon this week, great stress
being laid on the batting work.

To Race in Nebraska.

famous racing stallion owned by
George Heiler, of this city, has been
shipped to West Point, Neb., where it
will be trained to enter the Nebraska

Hastings and other large western
cities. The horse will be placed in
the string of R. N. Frost, who has
charge of him last year. The horse
will be brought to Peoria, Ill., on Aug.
10, to be entered in the races. Strath-
more has a record of 2:13 1/2 which
will allow him to race in the 2:12
class. Last year he made a record of
2:07 in a mile and will prove to be a
prize if he does as well this year.

is now the only surviving member of
the family. The funeral was held at

A BOY'S HOLIDAYS
The ardent controversy which has
been waged in England and America
concerning the best way to dispose of
school boys in the long summer vaca-
tion has prompted the Grand Trunk
Railway System to issue a special pub-
lication giving suggestions and prac-
tical hints to parents as to what to do
with the school boy during the months
of July and August. The vacation
camp is one of the solutions and the
publication entitled, "What Shall a
Boy Do With His Vacation?" thor-
oughly covers the ground. A copy may

ATTEMPT TO STEAL RIDE DISASTROUS

John Wilbur Had Leg Broken by Lump
of Coal Which Fell From Loco-
motive Tender.

As the result of an attempt to
"beat his way" on a C. & N. W.
freight train from Minneapolis to
Janesville, John Wilbur, age 25 years,
is confined at the general hospital at
Madison with his right limb fractured
below the knee. The young man, it
appears, had been employed at Min-
neapolis and having sent all of his
money home, declared to travel to the
lower city via the "side door Pull-
mans." In this sort of transportation
he was utterly inexperienced. He
was perched on an iron rod under the
freight car attached to the locomotive
tender, when, as the train was leaving
Lodi, a chunk of coal dropped from
the tender onto his right leg. Though
suffering excruciating agony from the
impact, he did not release his hold or
lose his presence of mind. After the
train reached Madison at 3:30 Wed-
nesday morning he had to call for
help and was subsequently conveyed to
the hospital where Dr. Torney set
the broken member.

Unity of the Universe.
According to the Spencerian view,
the universe is a complex unity,
which, when reduced to its ultimate
analysis, is seen to be one fact—the
redistribution of matter and motion—
all phenomena being complex aspects
of that one fact. Under the name of
evolution Spencerianism undertook
to show that the universe, from star
to soul, has passed, by a process of
development, from the simple to the
complex through successive integra-
tions and differentiations. For con-
venience phenomena are divided into
sections—astronomy, geology, biology,
psychology, and sociology—but the
process is one, and the law of the
process is one. Evolution is one in
principle and fact.—Hector Macpherson,
in "Spencerianism Up to Date,"
in London T. P. Weekly.

Dignity of the English Waiter.
The English hotel waiter belongs to
a race which is slowly but surely be-
coming extinct, and carries about him
the melancholy aura of the doomed.
Every headwaiter at a British Inn has
in him, at least, the making of a
duke's butler. No glimpse of avarice
marks the perfection of his monimen-
tal manner, and if, at the last, he con-
descends to accept your call, it is
with something of an air of a dis-
crowned king.—Sketch.

estimated to amount to \$250,000,000.

JANESVILLE

The above picture was taken the
morning of the big fight and shows
the Jeffries training quarters. Below
is seen Jeffries and Tex Rickard talk-
ing, with Jeff smiling, evidently ex-
pecting a victory over his black op-
ponent.

Jeffries' blood on it, taken from the
spot where he grasped the rope in
his first attempt to gain his feet after
being knocked down by Johnson in
the fifteenth and last round.

A copy of the official souvenir is
also enclosed as well as a picture
taken just before the fight began, and
a bit of the covering of the ring it-
self, all trampled and worn by the
feet of the fighters. Realizing that
many will be interested in these relics
of the big contest they have been
placed on a large card and placed in
the window of the Gazette where all
can see them.

They will be found in the west win-
dow of the office, where the baseball
scores are displayed each evening and
can be easily seen from the sidewalk
by all who care to view them. The
letter which follows was written on
the evening of July Fourth, directly
after the fight was over, and is as
follows:

Reno, Nevada, July 4.
Editor Gazette:

"It was a great day for Reno—the
greatest in her history.
Nothing like the event of this after-
noon has been equaled in the history
of the sporting world.
The wonderful crowd was a sight
worth traveling thousands of miles to
witness.
But the fight!

It was a bitter disappointment to
the thousands of fight fans who had
spared no expense to be on hand all
the way from England to far away
Australia.

In fact, I have witnessed more in-
creasing boxing bouts right in Janes-
ville. The mighty Jeffries fell down,
so to speak, right from the first round
and in all the fifteen rounds the big
black out-fought him at every stage
of the game.

To go into details regarding this
battle would be state to the Gazette
readers who received the news be-
fore we left our seats at the ring side.
Thanks to my Wisconsin nerve I re-
ceived an appointment as "deputy
sheriff" and when the fight started I
was within twenty feet of the ring
and in a seat that sold for \$50.

The two dozen vacant seats about
me were soon filled up by the fox-
y who quietly transferred men
from the \$20 seats to these \$50 seats
and for his nerve received a \$5 tip in
each instance.

Another usher removed a board
from the bottom of the arena and
admitted fully a hundred men, at \$5
each, before the police placed him un-
der arrest.

The crowd, estimated at about 20,
000, started to go out to the arena as
early as 10 o'clock in the morning al-
though the fight was not scheduled to
take place until 1:30 o'clock.

The big open air arena is at the edge
of the manufacturing section and only
about a mile from the business house-
s. The electric cars, aided by hun-
dreds of automobiles and vehicles of
every description, failed to carry one
tenth of the crowd.

The arena force, consisting of po-
lice officers, ushers and door keepers
numbered about four hundred. One
private balcony, was in the rear, was
reserved exclusively for ladies. This
was filled by members of the local
florist colony who were all heavily
veiled. In the arena proper were
scattered about 500 women who were
accompanied by their husbands.

Directly in front of me was seated
the pretty white wife of Johnson.
She is about twenty-five years of age
and all through the fight her big black
bobby would smile at her whenever
he had an opportunity. She never
failed to wave her hand back to him.
In the afternoon the moving picture
men stole a march on Tex Rickard

this country to report any event
were at the ring side. Several of
them had short-hand reporters at their
elbow and gave their dictation as the
rounds took place.

From New York to Pease news-
paper men of fame were in attendance
while several from England and Aus-
tralia were on hand. A complimentary
ticket was furnished each cor-
respondent who could show the cre-
dentials of a paper worthy the honor.
And plenty of country editors were
turned down and were only able to
enter the arena after plunking down
their cash.

Before the fight started fully ten
thousand people were on the outside
unable to secure the popular price
seats which sold at ten dollars.

One-half hour was devoted to the
introduction of all the present day
fighters as well as a dozen that are
now in the down and out class. Both
Fitzsimmons received the greatest ap-
plause from the immense crowd al-
though old John L. Sullivan was giv-
ing a hearty welcome. The weather
was ideal. In fact it was just right.

At two twenty Johnson entered the
arena with his trainers and was given
only a fair reception. Jeffries fol-
lowed five minutes later, from the op-
posite side of the arena, and the wel-
come that he received looked as
though the crowd suddenly went mad.
They stood up in their seats and
waved for fully two minutes.

When the going rounded for the
opening round it looked to nearly
every one present that Jeff was superi-
or in every way to the negro who
is not near as heavy. In all the fif-
teen rounds it was plain to be seen
that the black had it all over his op-
ponent. "The Spade" got in his fatal
work in dealing out several three up-
per cuts although Jeff drew first
blood.

Even as early as the third round I
was plain to be seen that Johnson
was landing wherever he pleased. In
this round he had Jeffries bleeding
as the result of a shoulder to the right
eye. It was then general talk in the
crowd that it was all over with Jeff if
he did not show more class.

In the fifteenth round the fatal
knockout took place and Jeff went
against the ropes. Inside of five min-
utes he was able to leave the ring un-
assisted and aside from a badly
bruised cheek was apparently all O. K.
As for Johnson he was all smiles
and in no way showed the effects of
the battle.

In fact, it was a tame affair for one
so widely advertised.

Last night was a wild one in Reno.
Three thousand people were obliged
to walk the streets all night for the
lack of places to sleep. It was no
trouble for one to rent a room for \$10
per night.

From its top he could look down upon the scene of battle. To the eastward stretched the harbor line with its rim of trees. A glance showed him that the light was not to center about these. They had served their purpose, and forced the mainlanders to seek a landing farther down the coast. The light of dawn had already begun to dispense the thick gloom of night, and an eighth of a mile below Nathaniel the Mormon forces were creeping slowly along the shore. The pale ghostly mistiness of the sea hung like a curtain between him and what was beyond, and even as he strained his eyes to catch a glimpse of the avenging fleet a vivid light leaped out of the white distance, followed by the thunder of a cannon. He saw the head of the Mormon line falter. In an instant it had been thrown into confusion. A second shot from the sea—a storm of cheering voices from out of that white chaos of mist—and the Mormons fell back from the shore in a panic-stricken, fleeing mob. Were those frightened towards the fierce fighters of whom he had heard so much? Were they the men who had made themselves masters of a kingdom in the land of their enemies—whose more name carried terror for a hundred miles along the coast? He was stupefied, bewildered. He made no effort to conceal himself as they approached the hill, but drew his pistol, ready to fire down upon them as they came. Suddenly there was a change. So quickly that he could scarcely believe his eyes the flying Mormons had disappeared. Not a man was visible upon that narrow plain between the hill and the sea. Like a huge covey of quail they had dropped to the ground, their rifles lost in that ghostly gloom through which the voices of the mainlanders came in fierce cries of triumph. It was magnificent! Even as the crushing truth of what it all meant came to him, the fighting blood in his veins leaped at the sight of it—the pretended effect of the shots from sea, the sham confusion, the disorderly flight, the wonderful quickness and precision with which the rabble of armed men had thrown itself into ambush!

Would the mainlanders rush into the trap? Had some keen eye seen those shadowy forms dropping through the mist? Each instant the ghastly pall that shut out vision seemed steadily drifting away. Nathaniel's staring eyes saw a vague shape appear in it, an indistinct dirt-gray blotch, and he knew that it was a boat. Another followed, and then another; he heard the sound of oars, the grinding of keels upon the sand, and where the Mormons had been a few moments before the beach was now alive with mainlanders. In the growing light he could make out the king's men below him, inanimate spots in the middle of the narrow plain. Helpless he stood clutching his pistol, the horror in him growing with each breath. Could he give no warning? Could he do nothing—nothing?

At least he could join in the fight! He ran down the hill, swinging to the left of the Mormons. Half way, and he stopped as a thundering cheer swept up from the shore. The mainlanders had started toward the hill! Without rank, without order—shouting their triumph as they came they were rushing blindly into the arms of the ambush! A shriek of warning left Nathaniel's lips. It was drowned in a crash of rifle fire. Valley after valley burst from that shadowy stretch of plain. Before the furious fire the van of the mainlanders crumpled into ruin. Like chaff before a wind those behind were swept back. Apparently they were flying without waiting to fire a shot! Nathaniel dashed down into the plain. Ahead of him the Mormons were charging in a solid line, and in another moment the shore had become a mass of fighting men. Far to the left he saw a group of the mainlanders running along the beach toward the conflict. If he could only intercept them—and bring them into the rear! Like the wind he sped to cut them off, shouting and firing his pistol. He won by a hundred yards and stood panting as they came toward him. Dawn had dispelled the mist-gloom and as the mainlanders drew nearer he discerned in their lead a figure that brought a cry of joy from his lips.

"Nell!" he shouted. "Nell!" He turned as Marion's brother darted to his side. "This way—from behind!" The two led the way, side by side, followed by a dozen men. A glance told Nathaniel that nothing much less than a miracle could turn the tide of battle. Half of the mainlanders were fighting in the water. Others were struggling desperately to get away in the boats. Foot by foot the Mormons were crushing them back, their battle cries now turned into demoniac yells of victory. Into the rear of the struggling mass, firing as they ran, charged the handful of men behind Captain Plum and Nell. For a little space the king's men gave way before them and with wild cheers the powerful fishermen from the coast fought their way toward their comrades. Many of them were armed with long knives; some had pistols; others used their empty rifles as clubs. A dozen more men and they would have split like a wedge through the Mormon mass. Above the din of battle Nathaniel's voice roared in thundering shouts to the men in the sea, and close beside him he heard Nell shrieking out a name between his blows. Like demons they fought straight ahead, slashing with their knives. The Mormon line was thinning. The mainlanders had turned and were fighting their way back, gaining foot by foot what they had lost. Suddenly there came a terrific cheer from the plain and the hope that had flamed in Nathaniel's breast died out as he heard it. He knew what it meant—that the Mormons at St. James had come to reinforce their comrades. He fought now to reach the boats, calling to Nell, whom he could no longer see. Even in that moment he thought of Marion. His only chance was to escape with the others, his only hope of winning her from the kingdom lay in his own freedom. He had waited too long. A crushing blow fell upon him from behind and with a last cry to Nell he sank under the trampling feet. Indistinctly there came to him the surging shock of the fresh body of Mormons. The din about him became fainter and fainter as though he was being carried rapidly away from it; shouting voices came to him in whispers, and deadened sounds, like the quick tapping of a finger on his forehead, were all that he heard of the steady rifle fire that pursued the defeated mainlanders in their flight.

After a little he began struggling back into consciousness. There was a splitting pain somewhere in his head and he tried to reach his hand to it. "You won't have to carry him," he heard a voice say. "Give him a little water and he'll walk." He felt the dash of the water in his face and it put new life into him. Somebody had raised him to a sitting posture and was supporting him there while a second person bound a cloth about his head. He opened his eyes and the light of day shot into them like a stinging, burning charge of needle-points, and he closed them again with a sharp cry of pain. That second's glance had shown him that it was a woman who was binding his head. He had not seen her face. Beyond her he had caught a half-formed vision of many people and the glimmering edge of the sea, and as he lay with closed eyes the murmur of voices came to him. The support at his back was taken away, slowly, as if the person who held him feared that he would fall. Nathaniel stiffened himself to show his returning strength and opened his eyes again. This time the pain was not so great. A few yards away he saw a group of people and among them were women; still farther away, so far that his brain grew dizzy as he looked, there was a black moving crowd. He was among the wounded. The Mormon women were here. Down there along the shore—among the dead—had assembled the population of St. James.

A strange sickness overpowered him and he sank back against his supporter. A cool hand passed over his face. It was a soothing, gentle touch—the hand of the woman. He felt the sweep of soft hair against his cheek—a breath whispering in his ear.

"You will be better soon," his heart stood still. "You will be better!" Against his rough cheek there fell the soft pressure of a woman's lips. Nathaniel puffed himself erect, every drop of blood in him striving for the mastery of his body, his vision, his strength. He tried to turn, but strong arms seized him from behind. A man's voice spoke to him, a man's strength held him. In an agony of appeal Marion's name burst from his lips.

"Shh!" warned the voice behind him. "Are you crazy?"

The arms relaxed their hold and Nathaniel dragged himself to his knees. The woman was gone. As far as he could see there were people—scores of them, hundreds of them—multiplied into thousands and millions as he looked, until there was only a black cloud about him. He staggered to his feet and a strong hand kept him from falling while his brain slowly cleared. The millions and thousands and hundreds of people dissolved themselves into the day until only a handful was left where he had seen multitudes. He turned his face weakly to the man beside him. "Where did she go?" he asked. It was a boyish face into which his pleading eyes gazed, a face white with the strain of battle, reddened a little on one cheek with a smear of blood, and there was a startled, frightened look in it that did not come of the strife that had passed.

"Who? What are you talking about?"

"The woman," whispered Nathaniel. "The woman—Marion—who kissed me—"

The young fellow's hand gripped his arm in a sudden fierce clutch. "You've been dreaming!" he exclaimed in a threatening voice. "Shut up!" He spoke the words loudly. Then quickly dropping his voice to a whisper he added: "For God's sake don't betray her! They saw her with us—everybody knows that it was the king's wife with you!"

The king's wife! Nathaniel was too weak to analyze the words beyond the fact that they carried the dread truth of his fears deep into his soul. Who would have come to him but Marion? Who else would have kissed him? It was her voice that had whispered in his ear—the thrill of her hand that had passed over his face.

And this man had said that she was the wife of the king! He heard the voices of other men near him but did not understand what they were saying. He knew that after a moment there was a man on each side of him holding him by the arms, and mechanically he moved his legs, knowing that they wanted him to walk. They did not guess how weak he was—how he struggled to keep from becoming too great a weight on their hands. Once or twice they stopped in their agonizing climb up the hill. On its top the cool sea air swept into Nathaniel's face and it was like water to a parched throat.

After a time it seemed a day of terrible work and pain to him—they came to the streets of the town, and in a half conscious sort of way he cursed at the rabble trailing at their heels. They passed close to the temple, dirt and blood and a burning moment shutting the vision of it from his eyes, and beyond this there was another crowd. An aide opened for them, as it had opened for others ahead of them. In front of the fall they stopped. Nathaniel's head hung heavily upon his breast and he made no effort to raise it. All ambition and desire had left him, all desire but one, and that was to drop upon the ground and lie there for endless, fearful years. What consciousness was left in him was ebbing swiftly; he saw black, fathomless night about him and the earth seemed slipping from under his feet.

FORTY YEARS AGO

July 8, 1870.—Arrested.—Capt. Putnam arrived on the afternoon train from Chicago, having in charge a man named Richard Dalton, who was arrested in that city on the charges of arson and perjury. The double crime was committed in this city, some time in March last. The property, claimed to have been burned by him, consisted of a building, household furniture and some other goods, on which he collected the insurance, after making affidavit to the effect that they were destroyed by fire. It transpired afterwards, however, that the goods and furniture had been hidden, and shipped to Chicago after the burning of the house, and on discovering this the insurance agent put an officer at work to ferret out the truth of the matter. The result is that Dalton is now in the county jail, awaiting an examination.

Jottings.—During the progress of a game of base ball at Milton on the 4th, Cheney, the catcher, and Newberry, the pitcher, in endeavoring to head off a flying ball, came together

with such force as to prostrate both. They laid upon the ground some length of time, insensible, Newberry bleeding at the mouth and nostrils from an internal injury. The accident stopped the playing for a half hour, when the players were filled and the game went on.

The iron chairs for Myer's new opera house arrived this afternoon. The console table is through with the larger portion of the second ward. The work of veneering the Baptist Church is nearly half completed.

The contract for making improvements on the jail property has been let to Mr. O. F. Nowlin, the lowest bidder, for \$297.

The building on Myer's water lot, at the upper bridge has been raised above high water mark and the foundation strengthened.

There was a pleasant gathering of young people at the residence of Mrs. B. P. Doty, in the Third Ward last evening. Upwards of one hundred persons were present, and all enjoyed themselves greatly.
